

Ariel Vardi

ariel@example.com | github.com/vardister | linkedin.com/in/ariel-var-di-334423ba

Summary

Research scientist and machine learning engineer with experience in underwater acoustics, inverse problems, and deep learning.

Experience

Tech Staff Member, MIT Lincoln Laboratory 2025–Present

- Building applied machine learning systems for scientific and engineering applications.

Education

Ph.D., Mechanical and Oceanographic Engineering, MIT/WHOI Joint Program 2025

M.Sc., Energy Engineering, Technion 2020

B.Sc., Environmental Engineering, Technion 2017

Selected Publications

- Vardi et al., *Sensitivity analysis of normal mode algorithms using automatic differentiation*, JASA, 2026.
- Vardi et al., *Estimation of the spatial variability of the New England Mud Patch geoacoustic properties using a distributed array of hydrophones and deep learning*, JASA, 2024.
- Vardi and Bonnel, *End-to-End Geoacoustic Inversion With Neural Networks in Shallow Water Using a Single Hydrophone*, IEEE JOE, 2024.
